

### SP LITHO LTD

SP Litho a two year old printing company which specialises in different languages and packaging for computer games, has doubled in size and clocked up an impressive turnover during its short life. Partner Dexter Coles has appreciated all the help that GFB have given him in getting to this point. This help has included the creation of a Business Plan to enable Dexter to apply for additional funding, the creation for an application for an environmental grant and a lot of management and specific skill training. Dexter has also made full use of the excellent free seminars provided by GFB such as Word and Powerpoint for Business and marketing seminars Double your Sales and Internet Marketing.

“GFB have been great at signposting me in the right direction and at creating a lot of networking opportunities. They are extremely approachable and proactive about keeping companies informed about the latest developments. I would have no hesitation in recommending other companies to enlist their help, especially those at an early stage of their business.”
